

Tanvi Sau

About Me:

- I have more than 6 years of combined experience with Process Transition management/ Implementation, Instructional Design and Learning & Development.
- Been responsible for establishing/ defining SOPs and creating content (for both self-paced/ instructor- led learning) along with modes of measuring its effectiveness for over 2500 employees, using LMS tools & HTML Guides (where I often engage simplifying technical aspects to non-technical folks).
- I have been successful at my tasks (across 20 partnered project/ processes from Technology/ Medical/ Logistics & Communication industry) due to effective interpersonal skills, collaboration, enabling attitude & adaptability.
- With a mixture of strong artistic sensibility and robust analytical thought process I usually turn out to be the person in the room that not only solves the most complex problem but also breaks down the solution into simpler tasks for everyone (both internal & external stakeholders) to collaborate and solve.
- I am skilled at project management, content design, interactive user/ facilitator/ process guides and graphic design.
